From FB group minimalism photography

Group goal is to share images that represent the complexity of simplicity.

1. Work with negative space
2. Incorporate spatial isolation
3. Add one color.

4. Seek out strict repetition

5. Square off your lines

6. simple geometric shapes

<https://contrastly.com/minimalist-photography/>

Minimalist photography draws inspiration from the concept of minimalism in art – a style of art that was used by many 20th century artists. Artistically speaking, minimalism depends on high simplicity and involves using a minimal amount of compositional components such as shape, color, and line.

The goal of minimalist art, or photography, is to convey a concept – or an idea – provoke an emotional response, or provide a unique visual experience. Compositional elements must be kept to a minimum, and the ones that are left should be essential for conveying the overall idea, or symbolism, of the photo.

As with any photographic style, minimalist photography has its own set of challenges – mostly due to the fact that minimalism is based on simplicity, and it can be a challenge to eliminate all but the most necessary elements of a composition, and focus only on a limited number of objects and elements when creating a composition. Minimalism forces you to view the world differently, and will challenge you to look beyond the obvious for hidden photographic opportunities.
